

**Disaster is a matter of chance
Your business isn't**

**Enterprise & Corporate grade
Business Continuity for Everyone**

Uni Systems provide guaranteed business continuity and disaster recovery for your organization without the massive cost and complexity of standing up an offsite datacenter or paying colocation services fees.

Our DR as a Service Solution Offering provides you the ability to quickly bring to market at an incredibly low price point a solution to ensure 7x24 DR protection and business continuity services.

Swift Implementation | 2-week plan

Week 1

- Cloud DR scenarios, objectives and requirements
- DR architecture, recovery process, and connectivity
- Setup and provision cloud infrastructure and connectivity
- Setup of on-premises resources and VM(s)

Week 2

- Deployment of DR solution & replication to Azure
- Remediation of workloads and VMs for Azure and DR solution compatibility
- Knowledge transfer & training

Low Risk

Eliminate concern of project failure

- No impact or changes to on premises IT services
- Proven methodology and process via previously developed Projects

Low Cost

Significant business and financial value

- Low up front, one-time implementation cost
- Low Operational cost, economies of scale of Public Cloud platform

Fast Implementation

Realize business benefit much faster than before

- One-time setup & configuration for entire enterprise
- Combination of mature technologies and previous projects experience minimizes implementation time

Customer Benefits

- Protect your VMWare, Hyper V and physical server infrastructure
- Low up-front provisioning cost and on-going operational costs
- Near zero risk of implementation project failure
- Incredibly fast time to market and time to value
