

Collaborate Anywhere

Collaboration is your productivity advantage

Uni Systems Work from Anywhere solution is based on Office 365 tools (Microsoft Teams, Azure AD, OneDrive, SharePoint and Exchange online). Companies proactively embracing secure collaboration and high-productivity remote-working practices, will achieve a competitive advantage in challenging times.

The workplace has never been as connected and ubiquitous as with Office 365. Office 365 tools can provide solutions for any remote working, collaboration and knowledge sharing demands and Uni Systems can help you provide concrete and proven work practices through a secure workplace accessible from anywhere, at anytime.

Over 500,000 organizations, including 91 of the Fortune 100 now use collaboration tools. Be the next.

Why

- Empower your workforce for the anywhere, anytime era.
- Provide high quality services to customers, irrespectively of location.
- Be able to cope with the increasing customer demand for electronic-based remote services.
- Be productive, no matter the location.

What

- Organize and coordinate multi-channel collaboration by deploying MS Teams and OneDrive
- Provide Document and Knowledge management by SharePoint Online
- Deploy Exchange Online for hassle-free mail management

How

Uni Systems can help you to:

- Identify needs and priorities.
- Assess and evaluate best practices for specific business needs.
- Plan and prioritize actions.
- Handle change management.
- Deploy and configure the solution.

Why collaboration anywhere matters?

- Coordinate team, actions and plans in a distributed manner.
- Achieve team coordination, control and efficiency from anywhere.
- Create and access document assets, files, emails and communications from a single point, anywhere, anytime.
- Cope with changing work habits, by creating an anywhere, anytime workplace.
