

A Modern & Fully Configurable Payroll Solution

Uni | PAYaaS services deliver via AtomoPlus Payroll and Human Resources operational platform, robust automation of human resources and payroll business processes and flows and personalized role-based solutions that enable fast and effective payroll administration and human resources related decision making.

AtomoPlus, has been re-architected to encompass pure internet architecture; is completely focused on the internet to provide powerful new functionality for internet-based access and integration, and, leverages a number of internet technologies, concepts, and features to deliver simple ubiquitous access to business processes, and enable in parallel the open flow of information between systems. Moreover it has been re-designed and further enhanced to deliver maximum automation of internal processes, optimal configuration, and scalability to all operations involving employees.

Robust Functionality & Optimum Business Flows

Uni | PAYaaS services grow along with the organizations business requirements to deliver a **solid, reliable approach via Cloud** to processing large volumes of payroll data - from payroll calculation and tax computation to check preparation, payroll reporting, and tax reporting, payroll execution and absences calculations by specifying all business application logic, such as earnings, deductions, absences, and accumulators, in terms of payroll rules. Moreover they support for loans and benefits administration, corporate training administration, and cost and budget calculation. Self-services capabilities are embedded in Uni | PAYaaS services to allow employees to participate in payroll, and leave/ absence processes.

Payroll Processes via a Reliable & Dynamic Data Center

Uni | PAYaaS services are offered reliably, speedily and securely via its state-of-the-art Data Center facilities, at a low monthly fee per employee, minimizing the total direct and indirect costs of the initial investment and reducing the time required for implementation and development.

Available 24x7

Uni | PAYaaS services are available 24x7; at anytime, from anywhere - any browser, any device, and easily configurable and customizable to address the all aspects of payroll operations as well as all specific business requirements and needs of organizations. They provide **robust automation** and **excellent orchestration** of all day-to-day human resources and payroll related operations, through a user friendly, fully **personalized environment** that delivers optimum cost controlling and efficient resources allocation.
